About

I'm Ashish Jaiswar, a **Automation Engineer**, **Full stack developer**, with some handson knowledge of **DevOps**. My mission is to build a personal brand, deliver quality work and spread my knowledge to the community.

Skills

HTML5 CSS 3 JavaScript Python Selenium Django React Next.js MySQL Git

Jenkins X

Experiences

Senior Systems Associate
Infosys Ltd. • May 2022 - March 2023

• Automated incident creation process using service now API. If a functionality failed in script execution an incident will be created
automatically and teams get notified via email.
• Created beautiful dashboard in power BI to visualise the health check reports. Dashboard has features like filter by date, Application,
Environment. Data has been visualised using Tables, Charts and Status labels in red and green colours.
• Impact: It saved manual effort of around 10 employees, Time saved approx. 756 hours monthly through automation, Reduced human
effort which saved cost around $2500 monthly.

Python Selenium JavaScript PowerBI Postman Flask Git HTML5 CSS 3

Jenkins SonarQube JFrog Artifactory Bitbucket

Operations Executive
Infosys Ltd. • November 2020 - May 2022

• Took ownership of environment health check automation to create automated script for 40 critical applications. Created automated
script for 40 applications using python selenium for 3-5 environments [Around 160 python scripts]. Implemented Test cases using
Pytest and developed SQL Server and email modules using python.
• Stored and Maintained health check scripts into bitbucket repository. Created jobs in Jenkins for each script and scheduled jobs to run
3 times a day. Implemented SonarQube Analysis.
